

**CTP Rx<sup>SM</sup>**  
*Prescribing  
Simplified*

Advanced Practice Nurses (APN) work in various different healthcare settings. Safe prescribing is always a priority. It is essential to ascertain tools that foster the highest levels of medication safety and accuracy. CTP Rx is a simple and efficient tool that provides immediate access to the prescribing formulary made available by the state board of nursing.

Just as with any other competency, there must be a means of ensuring that the APN's are prescribing medications in the safest way possible. The current formulary can be time consuming and quite cumbersome. Modifications to the formulary are issued on a regular basis by the Committee on Prescriptive Governance (CPG). Even with today's advanced technology, accessing the most up to date prescribing formulary can be challenging. The CTP Rx website creates a smooth path for safe and effective medication prescribing.

### How it Works

CTP Rx is a web based formulary that allows the APN to instantly lookup the most up to date prescribing information and the most up to date formulary all in one place. The registration process is completed in three easy steps.

1. Complete the site registration
2. Create a custom user profile and enter the state where you are authorized to prescribe
3. Begin searching for a specific drug; CTP Rx will tailor the results based on the state's approved formulary

### Sign Up Now

Joining CTP Rx is easy and can be completed in a matter of minutes. We accept the following forms of payment:
